

Discription

The CAT811 is a general-purpose purpose detector which only consume about 5uA at 3.6V, which can be widely used in all electronic system to either monitor a battery voltage or generate a power-on reset signal.It can work under the voltage ranging from 1V to 6V.CAT811 also provide a manual reset pin. CAT811 employs a low voltage reference, low offset comparator timer and push-pull output stage. Its push-pull output is pushed high after input voltage is greater than the internal setting level for 240ms. The CAT811 is available in SOT-143 package.

Features

- Wide operation range:1-5V
- Voltage detecting level setting range:2.3-5V
- SOT-143 package
- Detection delay time: 240ms
- Reset pin output kept low when input voltage < 1 V
- 4KV ESD

Applications

- Battery voltage monitor
- Power-on reset
- Set-top-box
- Voltage level trigger
- Press button debouncing
- Portable devices

Ordering information

Part No	Voltage Detecting Level	Package	Tape & Reel
CAT811ZTBI-GT3	2.32V	SOT-143	3K/Reel

CAT811STBI-GT3	2.93V		
CAT811TTBI-GT3	3.08V		
CAT811JTBI-GT3	4.00V		
CAT811MTBI-GT3	4.38V		
CAT811LTBI-GT3	4.63V		

Ordering information

The package of CAT811 is SOT-143, with pin assignment shown in following table:

Pin No	Name	Description
1	GND	Ground
2	RESET	The push pull output node, pulled low when V_{IN} is lower than detect level and pushed high when V_{IN} is higher than detect level for 240ms
3	MR	Manual Reset
4	VIN	The power input node as well as the voltage node to be detected

Absolute Ratings ($T_{amb}=25^{\circ}\text{C}$)

Parameters	Ratings	Units
Input voltage range ⁽¹⁾	-0.3 to +8	V
Lead Temperature	260	$^{\circ}\text{C}$
Output Voltage RESET ⁽¹⁾	-0.3 to $V_{IN} + 0.3$	V
Junction Temperature	-40 to +125	$^{\circ}\text{C}$
Continuous Power Dissipations ⁽²⁾	0.3	W
Storage Temperature Range	-65 to +150	$^{\circ}\text{C}$
Thermal Resistance, Junction-to-Ambient	280	$^{\circ}\text{C/W}$
Thermal resistance, junction-case	90	$^{\circ}\text{C/W}$

Notes:

- (1) Exceeding these ratings may damage the device.
- (2) The maximum allowable power dissipation is a function of the maximum junction temperature $T_J(\text{MAX})$, the junction-to-ambient thermal resistance θ_{JA} , and the ambient temperature T_A . The maximum allowable continuous power dissipation at any ambient temperature is calculated by $P_D(\text{MAX}) = (T_J(\text{MAX}) - T_A) / \theta_{JA}$. Exceeding the maximum allowable power dissipation will cause excessive die temperature, and the regulator will go into thermal shutdown. Internal thermal shutdown circuitry protects the device from permanent damage.

Electrical Characteristics

Parameter	Conditions	Min	Typ	Max	Units
Input voltage range, V_{IN}		1		6	V
Quiescent current, I_Q	$V_{IN} = 3.6V$, $T_A = 25^{\circ}C$	3	5	10	μA
	$V_{IN} = 3.6V$, $T_A = -40^{\circ}C$	2	3.5	10	μA
	$V_{IN} = 3.6V$, $T_A = 125^{\circ}C$	4	6.3	15	μA
Detecting voltage level, V_{DET}	$V_{DET} = 2.32V$	2.262	2.32	2.378	V
	$V_{DET} = 2.63V$	2.564	2.63	2.696	V
	$V_{DET} = 2.93V$	2.857	2.93	3.003	V
	$V_{DET} = 3.08V$	3.003	3.08	3.157	V
	$V_{DET} = 4.00V$	3.92	4.00	4.08	V
	$V_{DET} = 4.38V$	4.292	4.38	4.468	V
	$V_{DET} = 4.63V$	4.537	4.63	4.723	V
Delay time	$T_A = -40^{\circ}C$ to $85^{\circ}C$	150	240	560	ms
Reset falling delay	V_{IN} falling below V_{DET}		2	50	μs
Reset output low voltage, V_{OL}	$I_{SINK} = 1.2mA$, $V_{IN} = 2V$	0	0.03	0.3	V
Reset output high voltage, V_{OH}	$I_{SOURCE} = 1.2mA$, $V_{IN} = 3V$	$V_{IN} - 0.3$	$V_{IN} - 0.05$	V_{IN}	V
MR Theshold	V_{IH}	$0.7 \times V_{IN}$			V
	V_{IL}			$0.3 \times V_{IN}$	V

Function Descriptions

The CAT811 is a general-purpose voltage detector. It can work from 1V to 6V while consuming about 5 μA at 3.6V. CAT811 keeps monitoring its V_{IN} voltage, and RESET will jump high if V_{IN} voltage is higher than detecting level V_{DET} for 240ms. Given all these features, CAT811 is suitable for the applications like battery voltage monitoring, power-on reset, voltage comparison and even press button debouncing.

CAT811 also provides a manual reset pin.

Attention

- Any and all HUA XUAN YANG ELECTRONICS products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your HUA XUAN YANG ELECTRONICS representative nearest you before using any HUA XUAN YANG ELECTRONICS products described or contained herein in such applications.
- HUA XUAN YANG ELECTRONICS assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all HUA XUAN YANG ELECTRONICS products described or contained herein.
- Specifications of any and all HUA XUAN YANG ELECTRONICS products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- HUA XUAN YANG ELECTRONICS CO.,LTD. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all HUA XUAN YANG ELECTRONICS products(including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of HUA XUAN YANG ELECTRONICS CO.,LTD.
